POLICY

Health & Safety | Environment | Quality

Our Policy is to meet project requirements with regard to Health & Safety, Environment and Quality, as defined in the contractual documents, and to comply with company objectives. Our policy is based on the following fundamental values:

- Our Organization is a leader in the execution of major construction work due to our clients' trust and our commitment to Health & Safety, Environment and Quality;
- Our company is committed to comply with all client requirements as well as all applicable statutory, legal and other requirements;
- As part of a continual improvement effort, we implement measures to complete projects according to clients' quality requirements, in a healthy and safe environment while responsibly preventing and mitigating environmental impacts and pollution;
- We are committed to continually improve our Health & Safety, Environment and Quality management system's performance.

Prevent and reduce potential accidents
Prevent and mitigate the environmental impacts of our operations
Meet or exceed our client's expectations

All employees are responsible for enforcing this policy
in their work place and in their actions.

Serge Larouche,
President, District Manager
October 07, 2009
